

Amateur Radio Remarks - K5EMS

I live in a rural area -- too far for cable or telephone DSL. But, we already have 'high speed internet' -- thru wireless transmission!

Your issue on BPL is TOO late and TOO controversial for you to even consider it as an alternative. What do you think when you see and hear about all the other countries 'banning' BPL. I don't understand why it is even being considered?

Tell the electric companies to clean up the RF they are already producing, and put a 'grid system' in place which will produce electricity for everyone.
